## Professional Summary

A security-focused professional with a background in environments where vigilant threat assessment and calm under pressure are critical. I leverage a diverse skill set—forged in high-stakes situations—to analyze risks, secure assets, and ensure operational integrity. My approach combines formal training in network security with a practical, hands-on understanding of how to protect systems and people.

## Technical Skills

- **Security Tools:** Nmap, Wireshark
- **Operating Systems:** Windows (7, 10, 11, Server 2019), Linux
- **Languages:** C, C++, Java, JavaScript, Bash, HTML
- **Concepts/Frameworks:** NIST Cybersecurity Framework, ISO/IEC 27000, Cryptography, Digital Forensics, Network Troubleshooting
- **Hardware:** Cisco Routers & Switches, PC Assembly/Repair

## Certifications

- **CompTIA Security+** (2021 - 2024)
- **Cisco Certified Network Associate (CCNA)** (2021 - 2024)
- **Microsoft Technology Associate:** Windows Server Administration Fundamentals (2021)

## Experience

### Community Living Specialist - Floater

2023 - 2025

*Easterseals Midwest*

- Managed medication administration and documentation with a focus on strict protocol compliance and patient safety.
- Maintained detailed logs of client progress and care, ensuring accurate and auditable records.
- Supported individuals in developing skills for independent living, adapting plans to meet evolving needs.

### Special Education Resource Teacher

2019 - 2023

*William M Bedell ARC*

- Troubleshoot and supported the use of adaptive communication technologies for students with diverse needs.
- Developed and implemented individualized education plans (IEPs) to help students achieve specific learning goals.
- Fostered a structured and supportive classroom environment through careful planning and consistent engagement.

## **Security Specialist**

**2006 - 2016**

*Wild Country / Hollywood*

- Conducted real-world threat analysis and risk mitigation in high-stakes environments, relying on continuous observation and situational awareness to ensure patron and asset safety.
- Enforced security protocols through de-escalation, physical intervention when necessary, and strict access control (ID verification, contraband detection).
- Maintained operational security under intense pressure, regularly making rapid decisions to prevent and respond to incidents.

## **Inventory Control & Quality Assurance Associate**

**2016 - 2018**

*Amazon*

- Audited inventory using proprietary software to identify and resolve discrepancies, reducing loss and improving accuracy.
- Trained new team members on inventory management procedures and compliance standards.
- Maintained data integrity by reconciling physical stock with digital records.

## **Education**

### **Coursework in Cybersecurity & Computer Science**

**2022 - Present**

*University of Missouri Saint Louis - Saint Louis, MO*

- Focused on practical applications of cryptography, network security, and low-level programming in C++ and Java.
- Developed a solid understanding of security fundamentals and their implementation in real-world scenarios.

### **Associate of Applied Science in Cybersecurity and Networking**

**Graduated May 2022**

*Southwestern Illinois College - Granite City, IL*

- Studied network fundamentals, digital forensics, and cybersecurity principles in a hands-on learning environment.
